You may be able to save a life!

Graham is 42 and married with 2 children. He has Leukaemia and needs a Bone Marrow Transplant urgently. The Red Cross in Australia has searched the International Registries and has been unable to come up with a match.

Without the transplant, Graham only has a very slim chance of survival. Please consider becoming a donor, there are thousands of people around the world waiting for a donor and you may be a match for one of them.
